

BUREAU OF SOILS AND WATER MANAGEMENT

QUALITY POLICY

The Bureau of Soils and Water Management is the nationally-mandated agency on sustainable management of soil and water resources for agriculture.

We shall formulate measures and guidelines to effectively utilize and sustain productivity of soil and water resources to help attain food and nutrition security for the Filipino People.

We are committed to provide excellent services, science-based soil and water resources information and policy recommendations; products and technologies that are cost-efficient and environment-friendly.

To pursue our commitment, we shall:

Boost competence on soil and water resources research and development to contribute towards agricultural productivity.

Strengthen linkages and partnership with policy making bodies, scientific communities, national government agencies, local government units, international institutions, farmers and civil society organizations; and ensure mandatory compliance to relevant statutory and regulatory requirements;

Work towards effective generation, development and delivery of relevant and innovative soil and water products and services to our stakeholders.

Maintain high level of integrity and utmost professionalism and promote welfare of all employees.

We pledge to continually improve our quality management system through effective monitoring and evaluation of processes and feedback mechanism to meet customers' satisfaction.
